

Hello Pat

The Street Lighting guys came last night and fixed a metal shield to the light which certainly seems to have made a difference. They said to live with it for a while to check the improvement.

They spoke of an alternative method of fixing a box over the light which can be done if necessary. However, any improvement to us is a bonus and if the shield helps, then we will be happy. Obviously we want to avoid further costs to the Council if we can.

Many thanks to the guys and to yourself for being a really caring Council.
